WHAT WILL WE LEARN TODAY?

- How to use the internet safely.
- How to be kind and respectful online.
- How to avoid scams and fake news.
- How to use technology for learning and fun.

WHAT IS DIGITAL ETHICS?

- Digital Ethics means using the internet responsibly.
- It's about being safe, kind, and honest online.

Why does it matter?

- The internet is a great place for learning, playing, and connecting with others.
- But, just like in the real world, there are dangers if we are not careful.
- Being ethical means making good choices and treating others with respect.

✓ Examples of Good Digital Ethics:

- Being honest while chatting with friends.
- Not sharing someone else's photos without permission.
- Saying kind words instead of mean comments.

WHY IS DIGITAL ETHICS IMPORTANT?

1 Avoid Online Dangers:

- There are fake people on the internet who may try to trick us.
- Some websites show false information that we should not believe.
- Cyberbullying can hurt others' feelings and make them sad.

2 Learn Good Online Habits:

- Always think before clicking on links or sharing personal details.
- Respect other people's privacy online, just like in real life.
- Be aware of what is real and what is fake on the internet.

3 Be Kind and Respectful:

- Just like we should be polite in real life, we should be polite online.
- Treat others the way we want to be treated.

STAYING SAFE ONLINE

- ✓ Never share personal details like your full name, phone number, home address, or school name.
- ✓ Do not talk to strangers online or accept friend requests from people you don't know.
- ✓ Be careful of fake messages and scams – if something sounds too good to be true, it probably is.

What should you do if a stranger messages you?

- 🚫 Do not reply.
- 👤 Tell a trusted adult like a teacher or guardian.
- 🔍 Report the message if possible.

Signs of a Dangerous Message:

- Someone asks for money or personal details.
- A message says you "won a prize" but you never entered any contest.
- Someone threatens you or makes you feel uncomfortable.

USING TECHNOLOGY FOR GOOD

1 What Can You Do Online?

- Learn new things – watch educational videos, read books.
- Connect with friends and family through messages and calls.
- Play games responsibly – but not too much!

2 Tips for Healthy Technology Use:

- Set a time limit for watching videos or playing games.
- Balance screen time with physical activities like playing outside.
- Always use the internet in a safe and responsible way.
